Projects

Start Page / Code Playground [↗](#)

Aug 2022 – Present

Personal start page and menu guide for smaller projects.

- Created a toggleable search bar to quickly query multiple search engines
- Constructed a complex navigation menu
- Developed a multi-theme toggle using SCSS and JavaScript
- Deployed to GitHub pages

Ethereum Landing Page [↗](#)

May 2022 – Jun 2022

Revamp of the front page of ethereum with layout and UI fixes.

- Gathered Content from Ethereum Site
- Built using Bootstrap with SCSS
- Improved layout by fixing bugs

Bio Links [↗](#)

May 2022 – present

Built my own bio link menu to showcase my links from across the web.

- Learned preprocessing with SCSS
- Learned package management with NPM
- Coded a functional carousel for advocacy links using JavaScript
- Improved accessibility by implementing best practices

Web Portfolio [↗](#)

Mar 2022 – present

Developed a customized portfolio to showcase me as a developer along with my best works.

- Conceptualized and delivered an incredibly responsive layout
- Built using Vanilla HTML, CSS, and JavaScript (later updating the CSS to Sass)
- Coded features such as a modal and a theme switch
- Utilized a JavaScript carousel library for project showcase
- Used a third-party service for handling form emails

Profile Summary

Front-End Web Developer with a proven ability to build fully responsive, pixel-perfect, and user-friendly front-ends for websites and web apps. With a passion for both knowledge and structure, I am driven to learn and grow as both a developer and an individual.
