PROFILE SUMMARY

Junior front-end developer with a strong foundation in HTML, CSS, and JavaScript. Capable of creating visually appealing, user-friendly, and responsive websites and applications that meet client needs. Committed to staying up-to-date on the latest web development technologies and trends in order to provide the best possible solutions. Seeking the opportunity to utilize abilities and expand knowledge and experience in the field.

PROJECTS

Portfolio, Front-end Developer

Mar 2022 - Present

- Designed and developed a web development portfolio that showcases proficiency in front-end development, web technologies, and aesthetic sense, as well as a commitment to core concepts like accessibility and clean code.
- Maximized website accessibility by utilizing best coding practices and responsive design, resulting in a 50% improvement in Lighthouse accessibility scores.
- Improved website performance through image optimization, code minimization, and lazy loading, resulting in a 30% increase in PageSpeed Insights score.

EXPERIENCE

Harris and Watts Wellness, Web Developer

Jun 2020 - Jun 2021

- Created a branded website using HTML, CSS, and JavaScript, resulting in a 30% increase in conversion rate as indicated by online sales orders.
- Assisted in resolving project roadblocks by actively listening to team members and presenting creative solutions.
- Participated in building a product database, resulting in a 25% increase in revenue as measured by sales data.
- Collaborated with cross-functional teams to implement new process improvements and streamline operations, resulting in a 20% increase in productivity as measured by output measures.

Optimal Detailing Website, Full-stack Developer

Sep 2019 - Dec 2019

- Built a custom WordPress theme from scratch using PHP, including all design and functionality elements, resulting in a visually appealing and fully functional website.
- Increased development efficiency by utilizing Bootstrap for responsive design and WordPress for quick content management, resulting in a 30% reduction in the time required to build and maintain new features.
